To Whom It May Concern:

Our church recently completed a 20,000 square foot new build and a remodel of an existing 16,000 square foot space. In seeking the right fit for our church, T&W Church Solutions stood out as the right choice for us. Through the two-year long process, we found T&W to be a great asset to our process. As a pastor, it was very comforting to know that we had the expertise we needed to not just build a building, but to build a functional space that a church needs. Now that we are in the new space, I can say with confidence, that we made the right choice.

As in any build, there were bumps that came along the way. Bryan and Bruce were a great team to work with in solving these issues. In addition, their professionalism and dedication to our mission were evident. We never felt like a "client" to them, but rather a partner in the Kingdom.

I would recommend T&W for future church building needs.

Daniel Berry
Lead Pastor
