

## **Letter of Recommendation**

4/13/2022

To Whom This May Concern,

T&W Corporation has been performing work at Duke Energy for JLL since 2010. They have proven to be very professional and perform high quality work on a wide variety of projects. Scope, schedule, and budget have always been top priority for T&W Corporation.

In May of 2019 T&W was awarded the pre-construction services for a new data center to be constructed for Duke Energy. Throughout design T&W provided quality input and provided budgets at 30%, 60%, and 90% design phases. Their budgets were the most accurate budgets through design on any project of this size that I have ever been involved with. The input during design and quality work on budgets, T&W was awarded the construction portion of the project.

The data center project was a 14-month project and a \$16.5 million contract for T&W. Throughout this complex project T&W was extremely focused on the quality of work performed and meeting the construction schedule that was presented. T&W did an excellent job of planning ahead to allow the project to be successful. At the end of the project, schedule was met, completed within budget, and Duke Energy was happy with the end project.

I would recommend T&W on any upcoming projects and future projects.

Chad Hamm  
Senior Project Manager  
JLL
