RE: T&W Corporation  
3841 W Morris St  
Indianapolis, IN 46241

To Whom It May Concern:

We have had the privilege of working with T&W Corporation and their amazing staff on two building projects. The first was in 2012 and the last one in 2019. Our T&W Team for both projects has included Doug Beamer, Project Developer; Bryan Crostret, Project Manager and Jeff Hasty, Superintendent. These gentlemen worked well with us and with each other.

The scope of our first project was to remodel an existing warehouse with minimal offices space into a fungal diagnostics reference laboratory for our growing company. T&W took the 12,000 sq/ft building that we purchased and turned it into our company's new home. When our project was finished, the previous shell had been converted into a facility that housed three laboratories, private and group offices, a large meeting area, a breakroom, a dedicated storage room and room to grow. To describe this project as a remodel would be an understatement; it was really a transformation because the finished product did not resemble the original building. The only thing the two buildings had in common was the address.

Our second project was initiated by the success of our company and the need to expand to be able to meet the increase demand for our services and accommodate our growing workforce. Once again, we reached out to T&W Corporation to handle our project. The scope for this second project was to add a two-story addition onto our existing building without any disruption to our daily operations or ability to continue to provide testing services to our medical and veterinary clients. The team of Beamer, Crostret and Hasty delivered another winning project. The professionalism, expertise and execution exceeded our expectations. If there is another construction project in our future, we know we want to work with T&W.

Sincerely,

*Abigale S. Wheat-Lusiak*
