To Whom It May Concern:

We would like to take a moment to express our sincere appreciation for the opportunity to work with a company such as, T & W. For thirteen years, our church has worked to build a school and we have met with three builders, but it was not until T & W, that our 13 classroom, 21,000 square foot school addition, became a reality.

In the past, we had our share of troubles with builders- from roof leaks that were never repaired to more severe issues; we had distrust for builders in general. T & W has reconciled our ability to trust builders with their constant communication throughout the pre-planning, construction, and post-construction phases of building the school. Their quote for building the school was extremely competitive. They also did the little things like taking pictures and emailing them to us as we went along, coming to the ground breaking and never making us wait for a response to a question. From the receptionist to the company's leaders, this is an organization that exhibits strong character.

Please feel free to contact myself, or Mrs. Harris, with any questions regarding our experience with T & W at 317.898.4420.

Sincerely,

Taquoya Porter  
Project Coordinator
