To Whom It May Concern:

I am writing to strongly recommend T&W Corporation.

T&W Corporation acted as the general contractor for the expansion and remodeling of our Joe's Junction gas station convenience on Kentucky Avenue .

The combination of skill, experience and intuition provided by the T&W team we worked with is exactly what we needed to build the kind of facility we wanted to represent our company. The entire team was very qualified to perform to the level of skill required for this extensive store addition.

Andrew Huey, the Project Manager, as well as the superintendent Steve Davis and project developer Doug Beamer worked well with us and always kept our best interest in mind; and always understood our requests and concerns throughout the project.

Sincerely,

Ron Willis
Vice President and
General Manager
