T&W Design Build
7333 W. Washington Street, Suite A
Indianapolis, IN 46231

To whom it may concern:

This letter is to highly recommend T&W for their design and construction services. International Disaster Emergency Service (IDES) is a nonprofit, faith-based humanitarian aid organization that serves in the US and around the world. We engaged T&W for the construction of our Global Impact Center in Noblesville, Indiana. T&W worked with us on the design, engineering, and construction of 22,000 square feet of warehouse and multi-use space in 2025. We started with the design portion of the project in August 2024 and were handed the keys to our new building in October 2025.

Our organization needed to expand our current space to continue to meet the growing demand for physical Help and spiritual Hope of hurting people around the world. This Global Impact Center allowed us to dedicate space for our GAP program and launch new initiatives while also allowing us to better utilize our existing space for US Disaster Response.

T&W assisted us with capturing our vision for the new space. The architectural and engineering plans showed thought and care as well as compliance with the local building codes. T&W met or exceeded all expected deadlines and were effective in managing costs and minimizing change orders. Regular project updates were scheduled by T&W and communication responsiveness throughout was excellent. T&W also expected and adhered to all safety standards and expected the same compliance from their subcontractors and our own staff when they were on the worksite.

The construction quality, materials and workmanship is of high quality and T&W has went above and beyond in following up with any post construction concerns.

We do recommend T&W and look forward to working with them again when we begin Phase 2 of our building expansion.

Sincerely,

David Stine
Executive Director
